Memorandum

Subject: Ordot Landfill Sample Plan Review

From: *Patricia Connaughton*
Patricia Connaughton (P-3-2)
Quality Assurance Management SectionTo: Tom Mix (T-4-3)
Superfund Federal Response Section

The review of the final sampling and analysis plan for phase I remedial investigation, for Ordot Landfill, Guam, has been completed and accepted. The request for analysis to the lab from QAMS will be adjusted to compensate for analytical holding times which may be exceeded due to the three day shipment period from Guam to the lab.

Part VI, Table 6-2. Holding Times for VOA's will be 7 days from arrival at the lab to analysis. Holding Times for semi-VOA's and pesticides will be 3 days from arrival at the lab to extraction.

The change makes the request for analysis a SAS, but we do not anticipate problems in arranging for lab analysis as a result of this change.
